

SOLUTIONS

TO TRUNNION FLAKING, TRACTION AND LUBRICATION

Kelsan

TRUNNION STIKS

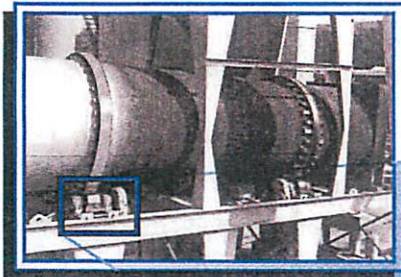

TRACTION STIKS

- For "Trunnion Driven" Systems
- Increases Traction
- Prevents Flaking

LUBRICANT STIKS

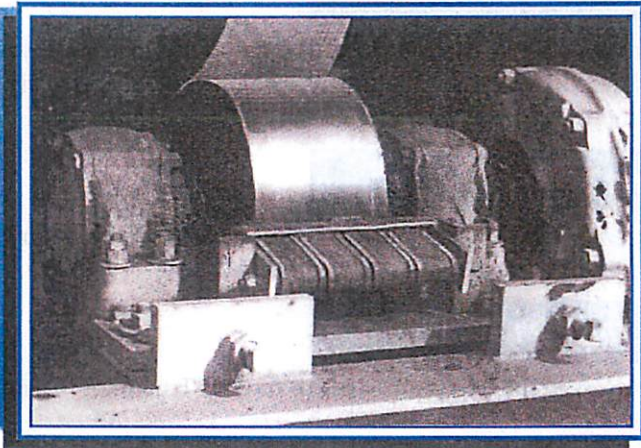

- For Gear or Chain Driven Systems
- Superior Lubrication
- Eliminates Wear

"My Trunnion Stiks minimize trunnion flaking and enhance traction dramatically... even in wet weather! My problems are totally resolved."

Dave Kyle, Windsor Service
Summit Station, PA

Satisfaction Guaranteed

Easy to Install • Totally Dry Material • Environmentally Safe • Long Lasting

TRUNNION STIKS

Used On All Rotary Equipment

Two innovative formulas... for "Trunnion Driven" systems which offers a high, positive friction, that improves operating performance and for gear and chain driven systems, where maximum lubricity is required.

Prevents Flaking

Misaligned trunnions cause flaking and uneven wear. Traction Trunnion Stiks dramatically reduce, and in many installations, have stopped flaking. The tough film deposited by the Trunnion Stiks effectively separates the tire from the trunnions, thereby reducing flaking.

Increased Traction

With Trunnion Stiks, traction is enhanced regardless of weather conditions.

Environmentally Safe

Unlike traditional oils and greases, Trunnion Stiks are **TOTALLY DRY** solids. The ingredients that make up Trunnion Stiks are inert and pose no threat to wildlife. Contaminants will not adhere to the film deposit.

Easy To Install

Trunnion Stik brackets are simply bolted to trunnion guards or to customer supplied angle iron to position the Trunnion Stiks in place. With only one moving part, they are adjusted upon installation and require no maintenance until replacement Stiks are necessary.

Long Lasting

These very hard, durable materials offer excellent life. Many users find that no refill is required for 1 to 2 years. Initial surface condition impacts Stik life.

Fit Any Size Trunnions

Kits are available in various sizes to fit your Trunnions. Custom designs available.
